RE: Application for Graduate Trainee – GIS

I am writing to express my keen interest in the Graduate Trainee – GIS position at your organization as advertised on your official website. I recently completed a Bachelor of Science in Software Engineering at Mbarara University of Science and Technology, with academic exposure and practical experience in GIS, spatial data management, and digital mapping, and I am passionate about the application of Geographic Information Systems in solving real-world challenges.

Through coursework and a hands-on QGIS project, I gained experience in extracting maps, managing shapefiles, and styling layers, and other related GIS concepts. My final year project and internship at Mbarara City Council further sharpened my skills in software systems and secure data handling.

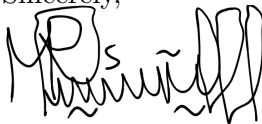

What particularly excites me about this opportunity is the chance to work under experienced GIS professionals at UEDCL and I am also eager to contribute to the development and maintenance of accurate geospatial datasets that support planning, field operations, and customer service.

I am ready to support your team in generating maps, assisting field staff and other roles mentioned. I am confident that my academic foundation, my passion for geospatial technology, and willingness to grow make me a strong candidate for this role.

I am available for an interview at your convenience and can be reached via 0764433174 or mugabipraise4@gmail.com. I look forward to the opportunity to contribute to UEDCL's vision and to grow professionally under your guidance.

Thank you for considering my application.

Sincerely,

A handwritten signature in black ink, appearing to read 'MP' followed by a stylized, cursive name.
